

EXCLUSIVE PROSPECTING & EXPLORATION OPPORTUNITIES IN NAMBIA

Creative Enterprises cc. is the holder of Exclusive Prospecting Licenses 3524, 3693 and 3624 issued by the Ministry of Mines & Energy in terms of Section 70 of the Minerals (Prospecting and Mining) Act, 1992, in the Erongo region of Namibia.

The area includes the small town of Arandis where labour and accommodation are to be found. Swakopmund lies 50 km from these EPL's. These sites have an excellent infrastructure and adjoins important amenities – a tarred road and the railroad. Two railway sidings are situated on EPL's 3524 & 3624. The water pipeline is also in close proximity as well as the powerlines, making this an excellent mining site, which is valuable as far as accessibility, services, transport, and availability of labour and accommodation is concerned.

The EPLS are adjoined and surrounded by 3 well-known mining licenses being Rössing, Uranium, Uramin Uranium Trekkopje, and Stone Africa Dimension Stone.

The areas of the Exclusive Prospecting Licenses are:

EPL3524	18,940.00 ha
EPL3693	14,723.00 ha
EPL3624	36,180.30ha.

EPL3524 has concession rights for base, rare metals, industrial minerals and dimension stone.

EPL3693 has concession rights for base and rare metals and industrial minerals.

EPL 3624 has concession rights for base and rare metals, precious metals, industrial minerals and dimension stone.

Should any further exploration licences for other minerals be required, application may be made for amendment of existing Exclusive Prospecting licence. Prospecting so far

has revealed the possibility of many potential exploration and mining opportunities. (Please note that at this stage Namibia Ministry of Mines has placed a temporary moratorium on the granting of a licence for mining Uranium.) .

On EPL's 3524, 3693 and 3624, there are reports of promising signs of deposits of many materials. There are also a history and signs of minerals and metals found or previously explored in these areas.

We are aware of the following:

Copper	Graphite
Moonstone,	Aragonite
Pegmatites	Labrodorite
Mica	quartz
Lead,	Moonstone
Zinc,	Dimension Stone (Numerous colours)
Silver	Gold
Salt	betafite
Wolframite	Pyrite
Malachite	Feldspar
Fluorspar	
Magnetite (iron)	

With in-depth prospecting and exploration in this area we are sure that many more finds will be recorded.

.

DIMENSION STONE

We started out specializing in Dimension Stone exploration and we already prospected for granite and marble in this area. Beautiful shades of the Namibian desert-coloured granite and many other colours of granite and marble were found. Provisionally we have identified at least 20 viable formations. There are many more deposits and this area has unlimited prospects for further in-depth dimension stone prospecting, Numerous colours of dimension stone, including the popular yellow colours similar to "Sahara" and the "African Range" are to be found in all forms and colours.

Dimension Stone colors identified so far:

Orange granite	Pink granite
White Brown with blue granite	White granite with black spots
Yellow granite (similar to Gaillo Duna)	Grey granite (Rustenburg)
Yellow granite (numerous different colours with movement)	
Red/Brown granite	White granite
Grey/Brown granite	White marble
Black and grey marble	Pink marble
Green granite	

This is just a brief summary of some of the colours found on this concession. I am sure that this site will be able to produce a lot of new and popular lines of dimension stone.

CONTRACTS

Agreements on joint, participation or other ventures may be negotiated to fit the needs of interested parties, investors or contractors. Foreign companies may form their own Namibian based companies for joint ventures, depending on their own requirements.

INVESTORS AND CONTRACTORS

Interested parties are welcome to contact [Ortis Trading Enterprises](#) for further information and where necessary arrangements can be made to inspect the areas personally.

ABOUT OUR COMPANY

Creative Enterprises cc. is a Namibian company, operating mainly in the mining field. For the past few years we have been very active in order to obtain viable sites with promising formations and where we know minerals are present. We have been fortunate to receive Exclusive Prospecting Licences on excellent sites in the Erongo region being a sought-after area with a very good infrastructure.

LOCATION
